Wahyu Pujiono

Platform Engineering Services

Jakarta, Indonesia

Summary

Passionate about acquiring new knowledge and tackling challenges head-on. Actively engaged with cutting-edge technology, I thrive in dynamic environments. A quick learner, I effortlessly adapt to new skills and methodologies. Driven by self-education and intrinsic motivation, I embody versatility and creativity, consistently thinking outside the box to deliver innovative solutions.

With a background in banking and information technology, I bring strong expertise as a middleware specialist. I am dedicated to achieving the best results in every task I undertake, with the ability to work effectively both independently and as part of a team. Committed to continual learning and growth in my career, I am ready to make a positive contribution in a dynamic work environment.

Experience

PT Bank UOB Indonesia
Platform Engineering Services
June 2024 - Present
Jakarta, Indonesia

Join as Platform Engineering Team, I have some responsibilities act as
Middleware Platforms:

- Demonstrated expertise in design, build, installed, configured, implemented and administered IBM MQ Advanced (including RDQM), Connect:Direct, and Red Hat OpenShift Container Platform on Linux platforms.
- Managed queue managers, channels, distributed queues, pub/sub messaging, and integration workflows.
- Performed monitoring, troubleshooting, support activity, patching, and security hardening to ensure high availability and compliance.
- Automated deployments and configurations with Chef and scripting for automation.
- Supported disaster recovery testing, collaborated with application teams, and developed best practice documentation.
